

IN THE CLAIMS:

Please amend the claims as follows:

Sub C,  
A2  
6 (Amended) A tumor antigen protein that is encoded by the DNA of claim 1.

Sub C2  
A3  
17. (Amended) A pharmaceutical composition for treating or preventing tumors, which comprises as an active ingredient at least one of substances selected from the tumor antigen peptides and derivatives thereof according to claim 9.

18. (Amended) A recombinant DNA comprising at least one of DNAs that encode the tumor antigen peptides or derivatives thereof according to claim 9.

21. (Amended) An antibody that specifically binds to the protein of claim 6.

A4  
22. (Amended) An antigen-presenting cell wherein a complex between an HLA antigen and the tumor antigen peptide or the derivative thereof according to claim 9, is presented on the surface of a cell having antigen-presenting ability, which cell is isolated from a tumor patient.

A5  
24. (Amended) A pharmaceutical composition for treating tumors,
